Theoretica Chimica Acta

A Journal for Structure, Dynamics and Radiation

Volume 76 1989/1990

EDITORS

Klaus Ruedenberg, Editor in Chief
Ames Laboratory USDOE and Department of Chemistry, Iowa State University, Ames, IA 50011, USA

David Chandler
Chemistry Department
University of California
Berkeley, CA 94720, USA

Ernest R. Davidson
Chemistry Department
University of Indiana
Bloomington, IN 47401, USA

Nicholas C. Handy
University Chemical Laboratory
Lensfield Road
Cambridge CB2 1EW, England

Joshua Jortner
Institute of Chemistry
Tel Aviv University
Ramat Aviv, Tel Aviv, Israel

Werner Kutzelnigg
Theoretical Chemistry Institute
Ruhr University
4630 Bochum 1, FRG

Josef Michl
Chemistry Department
University of Texas
Austin, TX 78712-1167, USA

William H. Miller
Chemistry Department
University of California
Berkeley, CA 94720, USA

Keiji Morokuma
Institute for Molecular Science
Myodaiji
Okazaki 444, Japan

Björn O. Roos
Department of Theoretical Chemistry
Chemical Centre, P. O. Box 124
University of Lund
S-22100 Lund, Sweden

Henry F. Schaefer III
Chemistry Department
University of Georgia
Athens, GA 30602, USA

Donald G. Truhlar
Chemistry Department
University of Minnesota
Minneapolis, MN 55455, USA

ADVISORY BOARD

R. Ahlrichs, Karlsruhe
V. Aquilanti, Perugia
R. J. Bartlett, Gainesville
M. V. Basilevsky, Moscow
M. S. Child, Oxford
K. F. Freed, Chicago
K. Fukui, Kyoto
E. J. Heller, Seattle
M. Karplus, Cambridge, Mass.
W. Kolos, Warsaw
W. Meyer, Kaiserslautern
M. D. Newton, Upton, New York
J. Paldus, Waterloo
L. Radom, Canberra
R. Zahradnik, Praha

SPRINGER INTERNATIONAL

Theoretica Chimica Acta

A Journal for
Structure, Dynamics and Radiation

Founded and edited in 1962 by H. Hartmann from Vol. 1 (1962) to Vol. 66 (1984).
As of Vol. 67 (1985) edited by K. Ruedenberg et al.

Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the (publisher, society); and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e. g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA

Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. This fee is US $ 0.20 per page, or a minimum of US $ 1.00 if an article contains fewer than five pages. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0040-5744, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Contents

Almlöf JE → Shida N
Arteca GA, Heal GA, Mezey PG: Comparison of potential energy maps and molecular shape invariance maps for two-dimensional conformational problems 377

Balasubramanian K → Hosoya H
Barbara PF → Shida N
Barone V, Minichino C: A theoretical characterization of the structure formation enthalpy, and fluzional behaviour of B_2H_6 and $AlBH_6$ 53
Bauschlicher, Jr. CW: An efficient two-electron integral transformation for vector-concurrent computer architectures 187

Cammi R, Hofmann H-J, Tomasi J: Decomposition of the interaction energy between metal cations and water or ammonia with inclusion of counterpoise corrections to the interaction energy terms 297
Cárdenas-Lailhacar C, Toro-Labbé A: Theoretical analysis of the internal rotation and determination of molecular structures of HSSH, HSSF and FSSF 411
Chen G-Y → Jiang Y-S
Chipman DM: Gaussian basis sets for calculation of spin densities in first-row atoms 73
Cioslowski J: Series analysis methods in enumeration of chemical isomers 47

Dehareng D, Dive G, Lamotte-Brasseur J, Ghuysen J-M: Numerical computation of the electrostatic interaction energy between methanol and dyad water-imidazole 85
Dias JR: Study of the origin of subspectrality in molecular graphs. Part II: Characteristic polynomials and eigenvalues of three series of related molecular graphs formed respectively from cyclobutadiene, benzene, and cyclooctatetraene 153
Dive G → Dehareng D
Dou Y → Wen Z

François JP → Martin JML
Fujita S: Subduction of coset representations. An application to enumeration of chemical structures 247

Ghuysen J-M → Dehareng D
Gijbels R → Martin JML
Gil VMS: The relation of directly bonded C—H coupling constants to *s*-characters revisited 291

Hameka HF → Kim H-W
Handy NC → Helgaker T
Heal GA → Arteca GA
Heitzsch O → Lorenz W
Helgaker T, Jørgensen P, Handy NC: A numerically stable procedure for calculating Møller-Plesset energy derivatives, derived using the theory of Lagrangians 227
Henriet Ch → Sana M
Herling GH → Witriol NM
Hofmann H-J → Cammi R
Hosoya H, Balasubramanian K: Exact dimer statistics and characteristic polynomials of cacti lattices 315

Jensen JO → Kim H-W
Jiang Y-S, Chen G-Y: On subspectral problem - benzenoid hydrocarbons with common eigenvalues $\pm$ 1 437
Jørgensen P → Helgaker T

Karabunarliev S, Tyutyulkov N: An extension of the Coulson — Rushbrooke — Longuet-Higgins theorem. II. A topological method for calculation of the number of nonbonding molecular orbitals 65
Kim H-W, Jensen JO, Hameka HF: Calculation of the deuterium electric field gradients in HD and LiD using a variation-perturbation method with a Gaussian basis set 285
Kvasnička V → Pospichal J

Lamotte-Brasseur J → Dehareng D
Leroy G → Sana M
Liu Z → Wen Z
Lorenz W, Heitzsch O: Quantum simulation of vibration states and Frank-Condon overlap in non-separable potentials 137

Martin JML, François JP, Gijbels R: Combined bond-polarization basis sets for accurate determination of dissociation energies. Part 3: Basis set superposition error in polyatomic systems 195
Meier U, Staemmler V: An efficient first-order CASSCF method based on the renormalized Fock-operator technique 95
Mezey PG → Arteca GA
Minichino C → Barone V
Montagnani R, Salvetti O: Approximate calculation of the matrix elements of Coulomb and exchange operators for the "core" electrons of the atoms In through Xe 1

Osamura Y: Analytic expression of the second derivatives of electronic energy for full configuration interaction wave functions 113

Pospichal J, Kvasnička V: Reaction graphs and a construction of reaction networks 423

Roos BO → Sadlej J
Roos BO → Widmark P-O
Rutkowski A, Schwarz WHE: Relativistic perturbation theory of chemical properties 391

Sadlej J, Roos BO: A quantum chemical study of the hydrogen bonding in the CO_2...HF and N_2O...HF complexes 173
Sakai T → Tanaka K
Salvetti O → Montagnani R
Sana M, Leroy G, Henriet Ch: Theoretical study of the borane and diborane positive ions 125
Schwarz WHE → Rutkowski A
Sen KD → Viswanath MB
Shida N, Almlöf JE, Barbara PF: Molecular vibrations in a gradient extremal path 7
Staemmler V → Meier U

Tanaka K, Sakai T, Terashima H: A method of incorporating quadruple correction in the scheme of multi-reference singly and doubly excited configuration interaction — a CSF based coupled pair approximation 213
Taylor PR: Symmetry-adapted integral derivatives (*Erratum*) 147
Terashima H → Tanaka K
Tomasi J → Cammi R
Toro-Labbé A → Cárdenas-Lailhacar C
Tyutyulkov N → Karabunarliev S

Viswanath MB, Sen KD: Density functional theory calculations of one electron Rydberg states in Li atom 373

Wang Y → Wen Z
Wen Z, Wang Y, Dou Y, Liu Z: Symmetry functions adapted to the subgroup chain $U(7) \supset SO(7) \supset G_2 \supset SO(3) \supset G$ 269
Widmark P-O, Roos BO: A CASSCF-CI study of the coordination of ethylene with iron 33
Witriol NM, Herling GH: A systematic treatment of three-dimensional quantum mechanical reaction coordinates 353

Živković TP: Solution of the generalized eigenvalue equation perturbed by a generalized low rank perturbation 331
